

## Barrel Clamps

Barrel Clamps - A Barrel Clamp is a mechanical or hydraulic accessory for a forklift. It could be used so as to compress the item you want to transfer using the lift truck and is usually used for handling barrels, kegs and paper rolls. A few designs of barrel clamp attachments likewise have a revolving function. For instance, the rotate function enables a forklift operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
