

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country voyage in their RV. Freshly retired, after spending several years working with his brother to develop their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

While on their trip, John spent time talking to past business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a substantial market for a product that could promptly and safely elevate people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they built and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into different marketplaces globally and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
