

Toyota Forklift Parts

Toyota Forklift Part - In the United States, Toyota Materials Handling inc., or TMHU, has been the best selling lift truck provider since 1992. This company has been headquartered out of Irvine, California for well over 40 years, providing a complete line of quality lift trucks. With a great reputation of stability and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

Every one of Toyota's manufacturing plants within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to continuous progress, and its environmental systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift trucks emit 70% less smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to manufacture high quality lift trucks at the same time as offering exceptional client support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines impressive World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other organizations and no other lift truck maker can equal Toyota's history of caring for the environment while concurrently encouraging the economy. Environmental accountability is a key feature of company decision making at Toyota and they are proud to be the first and only producer to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The finished creation is a lift vehicle that produces 70 percent less smog forming emissions than the present Federal standards tolerate.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and local parks that were damaged by fires and other ecological causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Toyota's lift vehicles offer improved stability, visibility, output, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps reduce the risk of accidents and accidental injuries, and increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability can discern situations that may lead to lateral instability and possible lateral overturn. When any of these factors have been sensed, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding stability.

SAS was originally launched to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS continues to be built-in to nearly all of Toyota's internal combustion models. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory operator education, overturn fatalities across all models have decreased by 13.6% since 1999. Also, there has been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training course to help purchasers meet OSHA standard 1910.178. Training services, videos and various materials, covering a wide scope of matters-from personal safety, to OSHA regulations, to surface and load situations, are accessible through the supplier network.

Toyota has maintained a continuous presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service

components, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and finally a education center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing features make Toyota dealerships a one-stop shop to ensure total consumer satisfaction.
