

Aerial Work Platforms

Aerial Work Platforms - There are numerous attachments used for forklifts that could be utilized to be able to help expand the capabilities of your lift truck and allow you to carry objects, handle materials with out difficulty or to finish clean-up tasks.

A few attachments were specifically used for the forks themselves. For instance, blade extensions are used when you need more blade length, that increases lifting capability. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are one more kind utilized if transferring rolled material so as to ensure it does not roll off of the typical flat forks.

Examples of lifting attachments include pivoting and telescoping boom or crane accessories. They could come in a number of different kinds and are most often utilized for transporting metal bars, lumber, poles and different kinds of bulky things. Additional accessories like for instance different kinds of hook plates and hooks are available in order to pick up stuff with a chain or sling. Magnetic lifters and slab lifters are other items that could be used together with hook accessories. Slab lifters are specialized accessories which are intended for carrying a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your lift truck to make transporting rolls of carpet easier. The attachment hooks onto the forklift's forks and has a pole which goes through the middle of the carpet roll.

There are several types of forklift attachment designed for facility maintenance such as snow blades. These industrial forks can be attached to front end loaders and utilized for transferring materials such as dirt, and mulch as well as snow. Other common cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers includes a broom which the forklift forks hook onto for sweeping big spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up quick and easy.

A material spreader is one more forklift accessory which is normally used at facilities. These spreaders are useful for various applications like spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting attachment are work platforms. These can be utilized by several various companies everyday. Platforms may range in size from 36" x 36" to up to 60" x 60". A few models may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location with the use of the forklift. Larger platform models have added space for staff so as to carry tools and other necessary items intended for the task. Often work platforms are made of steel or ploy material.
